Profile

BICT (Hons) undergraduate at the University of Vavuniya with a strong foundation in computer networking, routing, switching, subnetting, and IP addressing using Cisco Packet Tracer and CCNA-based learning. Experienced with Linux and Ubuntu environments, basic Python programming, and AWS cloud fundamentals. Passionate about network infrastructure, cloud technologies, and system administration, with strong problem-solving and analytical skills. Seeking a Network Engineering or Cloud Computing Internship to apply technical knowledge, gain hands-on industry experience, and contribute to reliable and secure IT infrastructure solutions.

Education

Bachelor of Information and Communication Technology (Honours)

2023 - 2027

University of Vavuniya, Sri Lanka

- Degree program focusing on Computer Networks, Computer Systems, Information Technology, Programming, Mathematics, and Network Administration.
- Developed a strong foundation in networking concepts including Routing, Switching, TCP/IP, IP Addressing, and Subnetting through academic studies and self-learning.
- Studied Linux and Ubuntu system administration fundamentals and basic Python programming for automation and problem-solving.
- Completed AWS Cloud Fundamentals training, gaining knowledge of cloud computing concepts, core AWS services, and cloud infrastructure.
- Continuously expanding knowledge in Network Engineering, Cloud Computing, Network Security, and Infrastructure Management to prepare for industry roles and internships.

Core Competencies

- Networking: Routing, Switching, TCP/IP, IPv4 Addressing, Subnetting, VLAN Fundamentals, Network Troubleshooting, CCNA Concepts.
- Cloud Computing: AWS Fundamentals, Cloud Concepts, Virtualization, Core AWS Services (EC2, S3, IAM Basics).
- Operating Systems: Linux, Ubuntu, Windows Administration Fundamentals.
- Network Tools: Cisco Packet Tracer, Network Configuration and Monitoring Basics, Command Line Interface (CLI).
- Programming & Automation: Python (Basic), Bash/Linux Commands, Basic Scripting.
- System Administration: User Management, File System Management, Linux Networking Fundamentals.
- Infrastructure & Security: Network Security Fundamentals, Access Control Concepts, Basic Firewall and Security Awareness.
- Version Control & Collaboration: Git, GitHub.
- Professional Skills: Problem Solving, Analytical Thinking, Teamwork, Communication, Continuous Learning.

Projects

Online Doctor Consultation Platform (Web Application)

- Developed a web-based platform to connect patients with online doctors for appointment booking and consultation management.
- Implemented core features such as user registration, doctor listing, scheduling system, and basic communication workflow.
- Focused on system functionality, usability, and structured backend logic to simulate a real-world healthcare service platform.

Networking Lab Simulations (Cisco Packet Tracer)

- Completed multiple networking labs using Cisco Packet Tracer to simulate real-world network topologies.
 - Practiced and implemented routing, switching, IP addressing, subnetting, and basic network configuration scenarios.
 - Built and tested LAN/WAN network models to understand data flow, connectivity, and troubleshooting techniques.
 - Earned certification demonstrating foundational networking skills and hands-on lab proficiency.
-
